

Specification Sheet

Betta Pro Sport Mesh System – Welded Security Mesh System

The Betta Pro Sport Mesh System is derived from the highly successful and durable Betta Pro Mesh Flat system and gives three main optional finishes to the bottom of the mesh. Twin horizontal wires ensure that the system is especially suited to high impact situations such as ball courts or school playgrounds. Efficient manufacturing processes ensure that the system is long lasting at an affordable cost.

The system is supplied in fully welded panels, allowing quick and simple installation. Betta Pro Sport Mesh can be installed up to 5.0 metres in height, making it an ideal and safe enclosure for multi purpose games areas favoured by Local Authorities and schools. Full-length clamp strips give a safe, secure and vandal resistant fixing.

The Betta Pro Sport Mesh System is produced from galvanised wire, with a phosphate pre-treatment and polyester powder coated from a range of nine standard colours:

PRO SPORT MESH

Colour Range

Green (RAL 6005)
Black (RAL 9005)
Gentian Blue (RAL 5010)
Sapphire Blue (RAL 5003)
Flame Red (RAL 3000)
Wine Red (RAL 3005)
Traffic Grey (RAL 7042)
Cadmium Yellow (RAL 1021)
Chocolate Brown (RAL 8017)

Benefits

Strong and reliable security
Ideal for sports areas and other high impact applications
A range of heights up to 5.0 metres
Versatile bottom option
Attractive appearance
Vandal resistant
Quick and simple installation
Cost effective
Low maintenance

Typical applications

Multi use sports areas
Single use sports areas / tennis courts
Parks and recreation areas
School and campuses

Betta Pro Sport Mesh panels

The Betta Pro Sport Mesh panels have a mesh size of 200 x 50 mm, formed with 6 mm vertical and double 8 mm diameter horizontal wires, fully welded at every intersection.

Betta Pro Sport Mesh System posts

The Betta Pro Sport Mesh posts range from 60 x 40 to 120 x 60 mm square hollow section with plastic cap based on fence height. A full-length 40 mm wide clamp strip with M8 stainless steel security head bolts, ensure a safe, secure anti-vandal fixing.

Optional Base Panels to the Systems

The bottom 1208 mm of the **Betta Pro Sport Mesh Rebound** system has extra double 8 mm horizontal wires giving a very durable and robust 50 x 65 mm mesh size. The lower section of this system is not only hard wearing but offers a good 'safe by design' choice to eradicate hiding places.

The bottom of the **Betta Pro Sport Mesh Rebound Board** system has a special 1220 deep timber panel fixed to the posts, with Betta Pro Sport Mesh above. The combination of the special timber panel and welded mesh, gives a tough hardwearing surface that is suitable for any ball game.

Betta Gates

Gates of all sizes and configuration are manufactured to the highest standards and maintain the site security offered by the fences. Swing, sliding cantilever and bi-folding gates are offered for manual use or automated by the specialist department of the Betta Group. The Gate Automation Department can offer a high quality and reliable 'Speed Gate'.

Technical / installation

Standard heights:

1030 mm, 1830 mm, 2030 mm, 2430 mm,
2860 mm, 3060 mm, 3460 mm, 4060 mm,
4460 mm, 4860 mm
