Clamp bar	40 x 6 m slotted	40 x 6 m slotted	40 x 6 m slotted
Fixings	8 galv bolt c/w Permacone security nut		
No. of fixings	8	9	11

Peart MasterView 358 is the definitive mesh fencing system for perimeter protection, offering maximum security and anti-corrosion protection.

Peart MasterView 358 is suitable for use in many locations where security is paramount and particularly where good visibility has to be maintained, such as prisons and airports.

The design of this system not only makes it the most secure within the MasterView range, it creates the most formidable perimeter solution available today.

Specifications are for guidance only and are subject to change without notice. Please check before ordering.

Features	Benefits
12.7 x 76.2mm mesh aperture	Virtually impossible to climb, penetrate or cut. Minimal visual impact
Posts are 3mm - Minimum SHS	Peart MasterView posts are the strongest of any comparable system
MasterFix - Continuous clamp bar fixing	Most secure mesh-fixing method. No threaded inserts in posts which can spin making installation difficult
Permacone M8 security fixings	Anti-vandal and tamper resistant
Peart MasterView 358 is available in powder n MasterView 358 specifications can be coated or galvfan finishes	Peart MasterView 358 specifications can be tailored to suit most budgets
Peart MasterView is manufactured in the UK	Extensive stocks are available for immediate despatch on with crane offloading

358 Posts: Square hollow section posts provide additional strength and safety to the MasterView 358 range. Plastic post-tops prevent water ingress. Baseplated, cranked and bespoke post specifications are also available.

358 Finishes: MasterView 358 panels are available in two finishes: Galvfan or Pre-galvanised and polyester powder-coated (BS 1722 (BS 6497) Part 16 compliant) providing an architectural coating of 60 microns minimum which greatly extends the life of the fence. MasterView posts and clamp bars are available hot dip galvanised to BS EN 1461 or galvanised and powder-coated.

358 continuous clamp bar fixing: The most secure method of securing panels to posts. A continuous 40 x 6mm flat bar clamps the mesh panels together. M8 fixings pass through the posts and are secured from the inside of the fence by means of anti-vandal and tamper resistant Permacone security fixings.
